

Patio Plus Heaters...

- are available in either propane or natural gas fired models
- are available for portable, stationary and hanging applications
- are backed by our 4 year "No Ifs, Ands, or Buts" guarantee
- have a storage space in the base for a 20 or 30 lb. propane cylinder
- at 50,000 BTU will operate on a 30 lb. propane tank for approximately 15 hours
- are available in black, hunter green and stainless steel with black trim
- provide gentle warmth over a 20 ft. diameter circle (325 sq. ft.).
- are available with either manual piezo spark igniters, or Direct Lite spark ignition operated by switch or remote control
- are made in Canada by Easy Radiant Works, a company with more than 45 years experience in the infra red heating industry
- are made with commercial grade components and materials

Portable Model

PH-45-30-P-LP (Propane Only)

Totally portable, self contained heaters that require no external gas or electrical connections. A Propane cylinder is conveniently housed in the base of the heater. Push button spark igniter, or battery operated spark ignition with manual and remote control - no electrical connection required. Exclusive "No If's, And's, or But's" 4 year warranty.

- 50,000 BTU Propane
- Holds 20lb or 30lb propane cylinder
- 15 to 20 hours on one tank of fuel

- Available in Black, Green, and Stainless Steel finishes

Free Standing Models

PH-45-FS-LP (Propane)

PH-50-FS-N (Natural Gas)

A portable heater on a weighted base for use with an approved flexible gas connector connected to a natural gas or liquid propane gas supply. Push button spark igniter or battery operated spark ignition with manual and remote control - no electrical connection required. Have a gas outlet on your deck, and one by the pool!

- Assembles & disassembles in minutes for easy storage
- Exclusive "No If's, And's, or But's" 4 year warranty
- Available in black, green, and stainless steel finishes

Stationary Models

FIXED BASE and INGROUND

These models are designed for permanent installation.

All stationary models are available with a manual piezo spark igniter, a 24v
wired Direct Lite ignition,

or battery operated spark ignition with manual and remote control.

Direct lite models have no standing pilot light.

Exclusive "No If's, And's, or But's" 4 year warranty.

Fixed Base

PH-45-FB-LP (Propane)

& PH-50-FB-N (Natural Gas)

In Ground

PH-45-IG-LP (Propane)

& PH-50-IG-N (Natural Gas)

Hanging Models

Permanently installed hanging model with push button spark igniter, or battery operated spark ignition with manual and remote control, or a 24v direct light - no standing pilot.

For hanging installation below a suitable structure.

Gas piped from natural gas source or bulk propane.

Exclusive "No If's, And's, or But's" 4 year warranty.

PH-45-H-LP (Propane)
PH-50-H-N (Natural Gas)

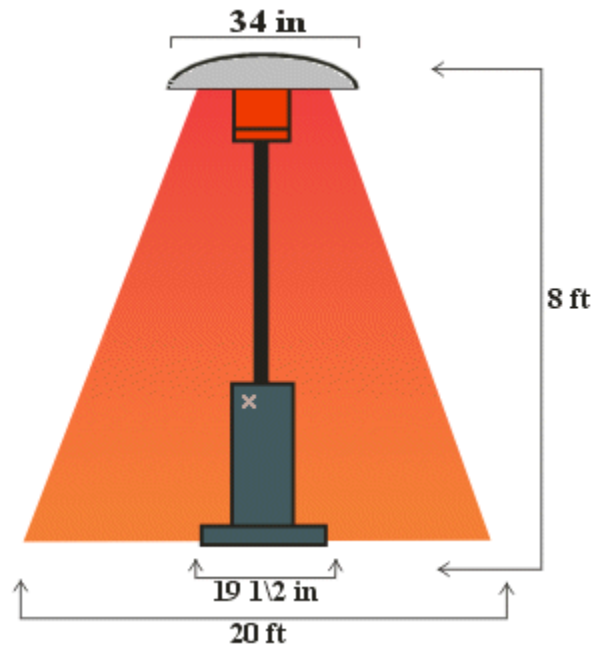

PH-45-HC-LP (Propane)
and PH-50-HC-N (Natural Gas)

Heat Pattern

Clearance to Combustibles
Above Reflector 18"
Beside Reflector 30"
Below Reflector 30"

34 inch Patio Plus Reflector

The 34" Patio Plus reflector is the result of extensive testing and research. It's a lot more than just a decorative cover. It has been designed and tested to achieve the highly efficient reflector we use today. The Patio Plus reflector concentrates the radiant energy from the high output infrared burner, into the 20 ft. circle of heat. Stray radiant energy is redirected to the inside of the circle by increasing the intensity of the heating footprint. It has been performance tested by the highly respected Food Service Technology Center in San Mateo, California. [Click here to read their testing and findings.](#)

Patio Plus Outdoor Infra-Red Heaters are made by Easy Radiant Works, a company with more than 30 years experience in the residential commercial and industrial infra red heating industry. All units are 50,000 BTU Propane and Natural Gas
