

Hi,

Bridlewood Home Product, especially John made our conversion from a Wood Burning Fireplace to a Natural Gas fireplace a pleasant experience. From the in showroom consultation to coming to our home John thoroughly explained everything. Once the decision was made on the fireplace the installation was seamless. The installers were very professional careful in removing the old fireplace and installing the firep lace. They were very good at answering any questions and explaining the installation procedure. John even returned to our house after the fireplace was completed to answer some further questions and assist in programing the remote. I would highly recommend Bridlewood Home Products to install a Natural Gas Fireplace in any home.

Thanks

Al
